Time
Research

• The discovery of new knowledge. Basic research.

• Clinical Research: The discovery of new knowledge that helps us provide better health care for human beings. Applied research.
Dr. Cicely Saunders Timeline

• 1940’s trained as nurse
• 1950’s worked as social worker on surgical cancer ward
  – Patients sent to hospice homes, e.g. St Joseph’s, to die.
• Trained as a physician (‘read medicine’); ineffective as nurse and social worker to effect change
• 1960’s Published ideas, began ‘hospice movement’ with purpose-built St. Christopher’s

Advice to Physicians about Palliative Medicine
‘Total Pain’ Addressed by Palliative Care

- Physical
  - Pain, other symptoms
  - Disease and its Rx

- Emotional
  - Response to illness
  - Coping Style, Skills

- Practical
  - Family system
  - Work, $, Plans

- Spiritual
  - Answer, ‘Why?’

- Physician
- Nurse
- Social Work
- Chaplain
Does Research support Saunders’ model?

- 6-site study, representative of US citizens
- Prognosis < 6 months
- 988 consented, 96% living at home
- 89% little or no stress to interviews
- Reproduced Saunder’s Model

Emanuel E, Arch Intern Med 2004;164:1999-204
Spiritual Screening Questions

- Your relationship with God contributes to your sense of well being
- You have a spiritual or religious community that helps in your personal spiritual journey
- How religious or spiritual do you consider yourself to be?
- Prayer or meditation has helped me cope with this illness.
- During times of illness, my religious or spiritual beliefs have been strengthened.

Where are emerging areas where spiritual care research is needed so that care will be improved?

- Patients
- Families
- Interdisciplinary Palliative Care Teams
- Learners
Kevin is 47 with neuroendocrine CA of Pancreas

PATIENT VIDEO
47 yo with Neuroendocrine CA Pancreas

- Living Naples, FL
- Treated Moffitt Cancer Center, Tampa
- Separated, bitter divorce over 2 children living with mother in Columbus, OH
- Admitted hospice care in Naples July 2012
  - Difficult pain, nausea, vomiting
- Transferred hospice care in Columbus, OH October 2012
  - Difficult pain, nausea, delirium
  - Living with mother-in-law caring for elderly father-in-law
- Dead November 2012
About which spiritual components do we need to discover new knowledge?

• Use of ‘God’ language
  – What does it mean?

• What sustains spiritual dimension? He says he was in a ‘bad place’
Hilary is in her mid 40’s with idiopathic heart failure on a transplant list. She is a single parent of a 6 yo daughter. No parents. No father of the child. Her friend is helping her.

FAMILY VIDEO
About which spiritual components do we need to discover new knowledge?

• Anger
• How to best respond?
Palliative Care Team
Jim is in his late 50’s. An oncologist, he’s been short with patients and staff. A hapless oncologist tries to intervene.

PHYSICIAN VIDEO
About which spiritual components do we need to discover new knowledge?

- Is professional satisfaction related to spirituality?
  - Meaning
  - Calling
Learners

Physicians (and others) learn most by seeing and doing than from hearing
Personal Reflection Project

Do something that reflects your personal engagement with palliative care

Hospice and Palliative Care is
A special thank you to the children’s team

Thank you for accepting me onto your team and taking the time to teach me

I am honored to learn from people who are able to comfort very sick children and their families
Children’s Team
About which spiritual components do we need to discover new knowledge?

- Joy
- Transcendence?
- Alleviation of suffering in all dimensions?
